

Proactive and Real-Time Security Service

Axxera, a premier managed security services provider, offers Proactive and Real-Time Security Service. Axxera's Proactive and Real-Time Security solution provides comprehensive monitoring, helping to detect and respond to the most sophisticated and malicious hacker attacks. The service is based on Central Intelligence's, Axxera's proprietary, next-generation security management and monitoring platform.

Central Intelligence offers the only true real-time monitoring service in the Managed Security Services industry to protect your company's mission-critical information assets in a proactive manner.

Axxera internet security service stops the most active botnets spreading virus, spam, phishing, DDOS attacks and exploiting harvesting bots in your network. Axxera implements intelligence based protection and traffic redirection technologies to prevent security issues before they happen. This prevents zero day attacks by assisting in dismantling communications of notorious global botnets.

Axxera uses global threat intelligence from sensors across the internet, this reputation based service continually updates our customers backbone routers with a personalized global threat lists to prevent inbound and outbound connection to malware sources and botnet controllers.

If your network has a compromised system, when it tries to communicate with its botnet, your core router protects and blocks the connection pro actively. This stops any data leakage and lets you assure good reputation IP addresses communicate through your network.

Using global real time statistics and global law enforcement intelligence we enable our customers to filter their traffic based on reputation. Based on this proactive protection companies are able to prevent and thwart security issues and exploits from the most notorious systems operating on the internet.

• Features of Proactive and Real-Time Security

- o 24x7 active filtering & protection from global reputation threats
- o 24x7 monitoring of backbone router & network
- o 24x7 configuration management

About Axxera

Founded in 2007, Axxera is uniquely positioned to safeguard the electronic presence of today's corporations. Our founders pioneered the security industry by designing, and building security infrastructure worldwide. Axxera has helped secure hundreds of global organizations, and e-businesses.

Axxera Managed Security Services delivers the expertise, tools and infrastructure you need to secure your information assets from Internet attacks 24/7/365, often at a fraction of the cost of in-house security resources. Access to the Axxera Portal a secure Web-based management tool, provides a single interface to easily monitor the security of your overall infrastructure of managed and unmanaged security devices.

Axxera's proprietary technology platform enables detailed processing of every event on your network. Our processing model gives expert analysts at Axxera's Security Operations Centers the advanced tools they need to provide real-time analysis and protection.
